## Exhibit F

*The FlyOver is a propriety image streaming technology allowing the simulation of 3D realistic maneuvers over aerial/satellite imagery. FlyOver is based on extremely efficient algorithm and very easy to use software tools for streaming very large area of high-resolution color image.*

## The FlyOver™

### A 3D Visualization Technology for "Visual Mining"

**Proprietary 3D engine streaming high-resolution image (satellite or aerial photograph) over the Internet at about 4k/sec. with six degrees of freedom**
